PROFESSIONAL SUMMARY

Results-driven Scrum Master and Agile Project Management with 9+ years of technology delivery experience, including 7+ years in Scrum Master and Agile Delivery and 3+ years in AWS DevOps. Proven experience leading cross-functional teams of 15–20+ members and managing Agile project planning, sprint execution, backlog management, capacity planning, release planning, risk and dependency management, stakeholder engagement, and delivery governance across FinTech, AI, EdTech, and R&D environments. Strong expertise in Scrum, SAFe®, Kanban, Agile transformation, Agile metrics, continuous improvement, and servant leadership, with hands-on proficiency in Jira, Confluence, Azure DevOps, and Agile dashboards. Complemented by AWS DevOps expertise across AWS, CI/CD, Jenkins, GitLab CI/CD, Terraform, Ansible, Docker, Kubernetes (EKS), and CloudWatch. PSM I, SAFe® 6.0 Agilist, Kanban Certified Practitioner, and PMP certified, combining agile leadership, technical delivery, and structured project management.

CORE TECHNICAL SKILLS

Scrum Mastery • Agile Project Management • Agile Delivery • SAFe® • Kanban • Lean Agile • Agile Transformation • Sprint Planning & Facilitation • Backlog Management & Refinement • Release Planning & Management • Capacity Planning • Project Planning & Governance • Risk & Issue Management • Dependency Management • Stakeholder Management • Agile Coaching & Team Mentoring • Impediment Resolution • Change Management • Continuous Improvement • KPI & Agile Metrics • Velocity & Burndown/Burnup Tracking • Cycle Time Optimization • PI Planning • Jira • Confluence • Azure DevOps • Miro • Trello • AWS DevOps • CI/CD

PROFESSIONAL EXPERIENCE

Senior Project Engineer — Senior Scrum Master | AWS DevOps Engineer **Jun 2024 – Present**
Kumaraguru Centre for Industrial Research and Innovation (KC.IRI), Coimbatore

- Drive Agile project delivery for two cross-functional teams of 20+ members, covering sprint execution, backlog management, release planning, risks, dependencies, and stakeholder coordination.
- Facilitate Sprint Planning, Daily Scrum, Backlog Refinement, Sprint Reviews, Retrospectives, and release governance.
- Coach teams on Scrum, SAFe®, Agile practices, estimation, story decomposition, and continuous improvement.
- Track velocity, sprint predictability, defects, delivery risks, dependencies, and release readiness through Jira and Agile dashboards.
- Manage delivery impediments and escalations while aligning Product Owners, engineering teams, leadership, and stakeholders on priorities.
- Support AWS DevOps delivery through CI/CD pipelines, cloud infrastructure automation, Docker, Kubernetes, and production release activities.
- Automate infrastructure using Terraform and support AWS environments including EC2, S3, IAM, VPC, RDS, EKS, ECR, and CloudWatch.
- Collaborate with DevOps teams on monitoring, deployment automation, release reliability, and continuous improvement.

Senior Engineer — Scrum Master | AWS DevOps Engineer **Sep 2020 – May 2024**
ASTRAN Tech Solutions Pvt Ltd, Bengaluru

- Managed Agile delivery for 2 cross-functional Scrum teams with 24+ members, ensuring sprint goals, delivery commitments, and stakeholder alignment.
- Facilitated Sprint Planning, Daily Scrum, Backlog Refinement, Sprint Reviews, Retrospectives, and Release Planning.
- Improved team velocity by 25% and achieved 95% sprint predictability through backlog refinement, estimation, KPI tracking, and proactive impediment management.
- Managed project risks, dependencies, escalations, capacity, release readiness, and stakeholder communication across distributed teams.

- Drove Agile process improvements through Definition of Ready, Definition of Done, retrospective actions, and standardized delivery workflows.
- Supported AWS DevOps delivery using EC2, S3, IAM, VPC, RDS, Lambda, EKS, ECR, and CloudWatch.
- Built CI/CD pipelines using Jenkins and GitLab CI/CD and automated infrastructure using Terraform and Ansible.
- Supported Docker/Kubernetes deployments, monitoring, logging, cloud security, and release automation across application environments.

Product Engineer — Scrum Master **Oct 2019 – Oct 2020**

Amphisoft Technologies, Coimbatore – E-BOX

- Supported Agile delivery for AI-driven EdTech platforms, coordinating Development, QA, UI/UX, Analytics, and Business teams.
- Facilitated Sprint Planning, Daily Scrum, Backlog Refinement, Reviews, and Retrospectives.
- Supported backlog prioritization, estimation, sprint tracking, impediment resolution, and release coordination.
- Monitored velocity, burndown, defects, sprint health, and release readiness using Jira and Confluence.
- Contributed to continuous improvement through retrospective actions and Agile metrics.

Project Engineer **Aug 2017 – Oct 2019**

Kumaraguru Centre for Industrial Research and Innovation (KC.IRI), Coimbatore

- Coordinated project execution across software, embedded systems, mechanical engineering, QA, and analytics teams on industrial automation projects.
- Tracked project schedules, dependencies, and delivery status; supported iterative development and release coordination.

PROJECT EXPERIENCE

Key Project 1: L&T – AI-Powered Construction Monitoring & Analytics Platform

Role: Senior Scrum Master | Agile Delivery Lead | AWS DevOps

Objective: Developed an enterprise web-based platform to monitor construction progress, workforce productivity, equipment utilization, and project KPIs through real-time dashboards and analytics.

Responsibilities:

- Served as Senior Scrum Master for cross-functional teams across Development, QA, AI/ML, Cloud, UI/UX, and Product Management.
- Led Sprint Planning, Daily Scrum, Backlog Refinement, Sprint Reviews, Retrospectives, Release Planning, and stakeholder reviews.
- Partnered with Product Owners and business stakeholders on backlog prioritization, sprint goals, roadmap alignment, and release planning.
- Managed delivery risks, dependencies, impediments, escalations, and cross-team coordination to maintain predictable delivery.
- Established Agile metrics and dashboards covering velocity, burndown, sprint health, delivery predictability, defects, and release readiness.
- Coached teams on Scrum practices, estimation, story decomposition, accountability, collaboration, and continuous improvement.
- Supported AWS DevOps and CI/CD delivery using Jenkins, GitLab CI/CD, Terraform, Docker, and Kubernetes (EKS).
- Coordinated cloud delivery and release readiness across AWS infrastructure, monitoring, deployment, and production environments.

Results: Improved sprint execution visibility, strengthened cross-functional collaboration, reduced delivery impediments, and improved release predictability through structured Agile governance.

Tools: Scrum • Jira • Confluence • Azure DevOps • Agile Metrics • Release Management • AWS • CI/CD • Jenkins • Terraform • Docker • Kubernetes

Key Project 2 : CredO – Digital Financial Management Platform

Role: Scrum Master | Agile Delivery Lead | SAFe®

Objective: Enterprise FinTech platform enabling customers to manage payments, investments, budgeting, expense analytics, and financial planning through web and mobile applications.

Responsibilities:

- Managed Agile delivery across distributed cross-functional teams using SAFe®, aligning sprint execution with Program Increment (PI) objectives.
- Facilitated PI Planning, Sprint Planning, Daily Scrum, Backlog Refinement, Sprint Reviews, and Retrospectives.
- Coordinated with Product Owners and stakeholders on backlog prioritization, dependencies, risks, and release planning.
- Coordinated with DevOps teams on AWS deployments, CI/CD pipelines, environment readiness, and release management.
- Supported cloud-native delivery using AWS, Jenkins, Docker, Kubernetes, and Git workflows.
- Tracked velocity, sprint predictability, PI progress, and delivery risks using Jira and Agile dashboards.
- Coordinated delivery across customer onboarding, payments, analytics, investment tracking, and reporting modules.

Results: Achieved 95% sprint commitment reliability, improved release visibility, reduced delivery bottlenecks, and strengthened cross-team alignment.

Tools: SAFe® • Scrum • Jira Align • Confluence • AWS DevOps • PI Planning • Agile Metrics

Key Project 3: Enterprise Workflow & Task Automation Platform

Role: Senior Scrum Master | AWS DevOps Engineer

Objective: Delivered an enterprise workflow and task automation platform using Agile practices to streamline business processes, approvals, collaboration, and operational reporting.

Responsibilities:

- Served as Senior Scrum Master for cross-functional Development, QA, DevOps, and Product teams.
- Facilitated Sprint Planning, Daily Scrum, Backlog Refinement, Sprint Reviews, Retrospectives, and Release Planning.
- Managed backlog prioritization, sprint goals, capacity, dependencies, risks, impediments, and delivery commitments.
- Partnered with Product Owners and stakeholders on requirements, priorities, release planning, and delivery governance.
- Tracked velocity, burndown, sprint health, defects, and release readiness using Jira dashboards.
- Coached teams on Scrum practices, estimation, story refinement, DoR/DoD, accountability, and continuous improvement.
- Supported AWS, CI/CD, Terraform, Docker, and Kubernetes (EKS) for application deployment and release automation.
- Coordinated DevOps teams on deployment readiness, monitoring, production releases, and delivery dependencies.

Tools: Scrum • Agile Delivery • Jira • Confluence • Agile Metrics • Backlog Management • Release Management • AWS • Jenkins • Terraform • Docker • Kubernetes • CloudWatch

CERTIFICATIONS

- Professional Scrum Master (PSM I) – Scrum.org
- SAFe® 6.0 Agilist – Scaled Agile
- Kanban Certified Practitioner – HelloSM
- Project Management Professional (PMP) – PMI

EDUCATION

Bachelor of Engineering – Kumaraguru College of Technology, Coimbatore

ACHIEVEMENTS

- Star Performer of the Year – KC.IRI (2019 & 2025)
- Iconic Scrum Master Award – Amphisoft Technologies (2021)
- Improved team velocity by 25% and achieved 95% sprint predictability leading Agile delivery for cloud-native platforms.
- Successfully led multiple cross-functional Agile teams of 10–20+ members delivering complex engineering and cloud/DevOps initiatives on time.
